

The Introduction to Engineering Construction (ITEC) Programme is a one year course and will give the selected young people the relevant skills, knowledge and health and safety awareness required to prepare them for working in the engineering construction sector.

# INTRODUCTION TO ENGINEERING (ITEC) PROGRAMME

## WHAT IT COVERS

The Engineering Construction Industry Training Board (ECITB) and The Engineering College are working in partnership to offer an excellent opportunity for students who wish to pursue a career within the Engineering Construction Industry.

Our ITEC Programme runs for an academic year for three days a week. While in centre, students will do 10 weeks of practical study in:

General Health & Safety  
Basic power tools/ hand tools  
Cutting and shaping  
Gas Cutting  
Plating  
Turning / Milling  
MMA

Students will also work towards achieving a Level 3 City & Guilds 2850 Diploma in Engineering.

## ENTRY REQUIREMENTS

Individuals must meet the following requirements to be accepted onto an ITEC programme.

- GCSE A\*-C grades in Maths, English & Science
- Varied Level 2 education essential
- Level 3 Non-engineering education considered (BTEC/ A Level accepted)

## PROGRESSION ROUTES

There is a potential for students to progress onto an Apprenticeship upon completion of their programme

## COURSE DURATION

Start date: September 2017  
Delivered 3 days a week
